

IR. OLIVIER NDIINGA OBA

SOFTWARE, DATA & AI ENGINEER

Brussels / Liège, Belgium | obavertu@gmail.com | +32 497 21 21 37
[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE

Computer Science and Engineering graduate from ULB (Master with Distinction) and former Royal Military Academy cadet, combining rigorous analytical discipline with broad technical expertise. Proven track record across Data Engineering, Advanced Analytics, AI modeling, and system architectures. Finalist in prominent innovation challenges (Huawei France Tech Arena, Future of IT Leaders). Versatile engineer capable of bridging complex technical implementation with business value and operational excellence.

PROFESSIONAL EXPERIENCE

Data Engineer & System Analyst 2023 - 2024

SNCB (National Railway Company of Belgium)

- **Pipelines & ETL:** Developed scalable Python frameworks to extract, transform, and structure massive sensor streams into reliable data architectures for predictive maintenance.
- **Data Quality & Security:** Guaranteed strict integrity, security, and performance of operational and analytical data flows.

Developer & Data Scientist 2022 - 2023

Voisin d'Énergie

- **AI & Predictive Modeling:** Designed and implemented deep learning models (LSTM in C++/Python) from scratch to forecast community energy consumption and optimize grids.
- **Cross-functional Delivery:** Translated complex requirements into actionable predictive algorithms and decision-making solutions alongside stakeholders.

EDUCATION

Master in Computer Science and Engineering (Distinction) 2025

Université libre de Bruxelles (ULB)

- Thesis: "Imitation of Swarm Behaviors with Topological Data Analysis"

BSc Engineering Sciences 2018 - 2022

École Royale Militaire (Royal Military Academy)

KEY PROJECTS & COMPETITIONS

- **Finalist, Huawei France Tech Arena:** Designed a dynamic traffic allocation algorithm for 6G networks, showcasing advanced network and optimization capabilities.
- **Database & Infrastructure Architecture (2026):** Engineered a normalized 3NF MS SQL Server database with ACID compliance, RBAC, and Docker-containerized Python ETL workflows.
- **Finalist, Future of IT Leaders in Belgium:** Data & AI Challenge (Nov 2025).

CORE COMPETENCIES

DATA & CLOUD ENGINEERING

Databricks, Pipelines, ETL, Data Warehouses, SQL, Azure Cloud.

AI & ADVANCED ANALYTICS

Machine Learning, Deep Learning (LSTM), Mathematical Optimization.

PROGRAMMING & SYSTEMS

Python, C/C++, Java, R, SQL, Linux/Windows Server Admin, UNIX.

DEVOPS & TOOLS

Git, GitHub, Docker, CI/CD, FastAPI, Power BI, Tableau.

LANGUAGES

FRENCH

Native

ENGLISH

C1 Professional

CERTIFICATIONS

IT SUPPORT & OPERATIONS

- Google IT Support Professional Certificate (Ongoing)
- Linux Server Administration
- Windows Server 2025
- MS SQL Server Administration

DATA ENGINEERING & INFRA

- IBM Data Engineering
- Relational Databases (IBM)
- Git & GitHub (Google)

AI & DATA SCIENCE

- Google AI Professional
- Reinforcement Learning (U. Alberta)
- Tableau Data Visualization

MANAGEMENT & PROJECTS

- Foundations of Project Management
